

Application No. 09/853,197
Amendment dated November 10, 2004
Reply to Office Action of August 12, 2004

Docket No. 1232-4714

Amendments to the Specification:

Please replace the title with the following new title:

-- IMAGE SENSING APPARATUS AND CONTROL METHOD THEREOF HAVING A
REDUCED FOCUSING PROCESSING.--

Please replace paragraph beginning at line 19 of page 8 through line 4 of page 9 with the following amended paragraph:

-- Reference numeral 24 denotes the image display memory, reference numeral 26 denotes the D/A converter and reference numeral 28 denotes an image display consisting of a TFT-LCD (thin film transistor-liquid crystal display) or the like. Image data for display written in the image display memory 24 is displayed by the image display 28 via the D/A converter 26. If sensed image data is sequentially displayed using the image display 28, it is possible to realize an electronic finder function. In addition, the image display 28 can arbitrarily turn on/off display according to an instruction of the system control circuit 50, and power consumption of the image processing apparatus 100 can be significantly reduced if display is turned off. --
